Releasing the potential of
natural capital

<https://upliftconnect.com/economics-form-brain-damage/>

Natural Capital can be defined as the world's stocks of natural assets which include geology, soil, air, water and all living things.

It is from this Natural Capital that humans derive a wide range of services, often called ecosystem services, which make human life possible.

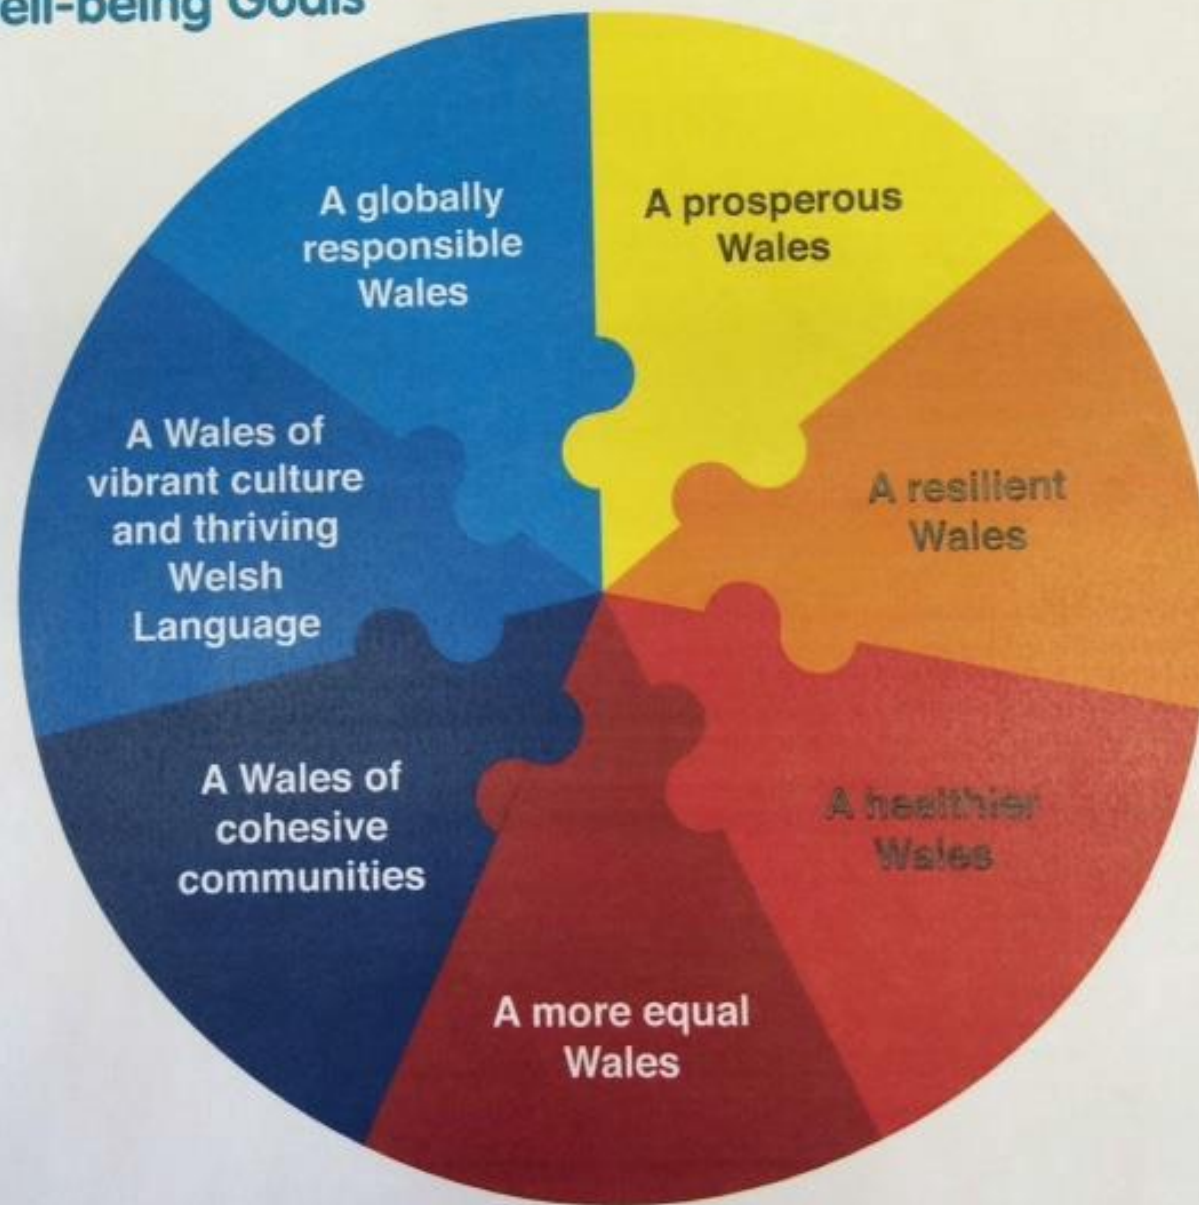

The most obvious ecosystem services include the food we eat, the water we drink and the plant materials we use for fuel, building materials and medicines.

Well-being of Future Generations (Wales) Act 2015

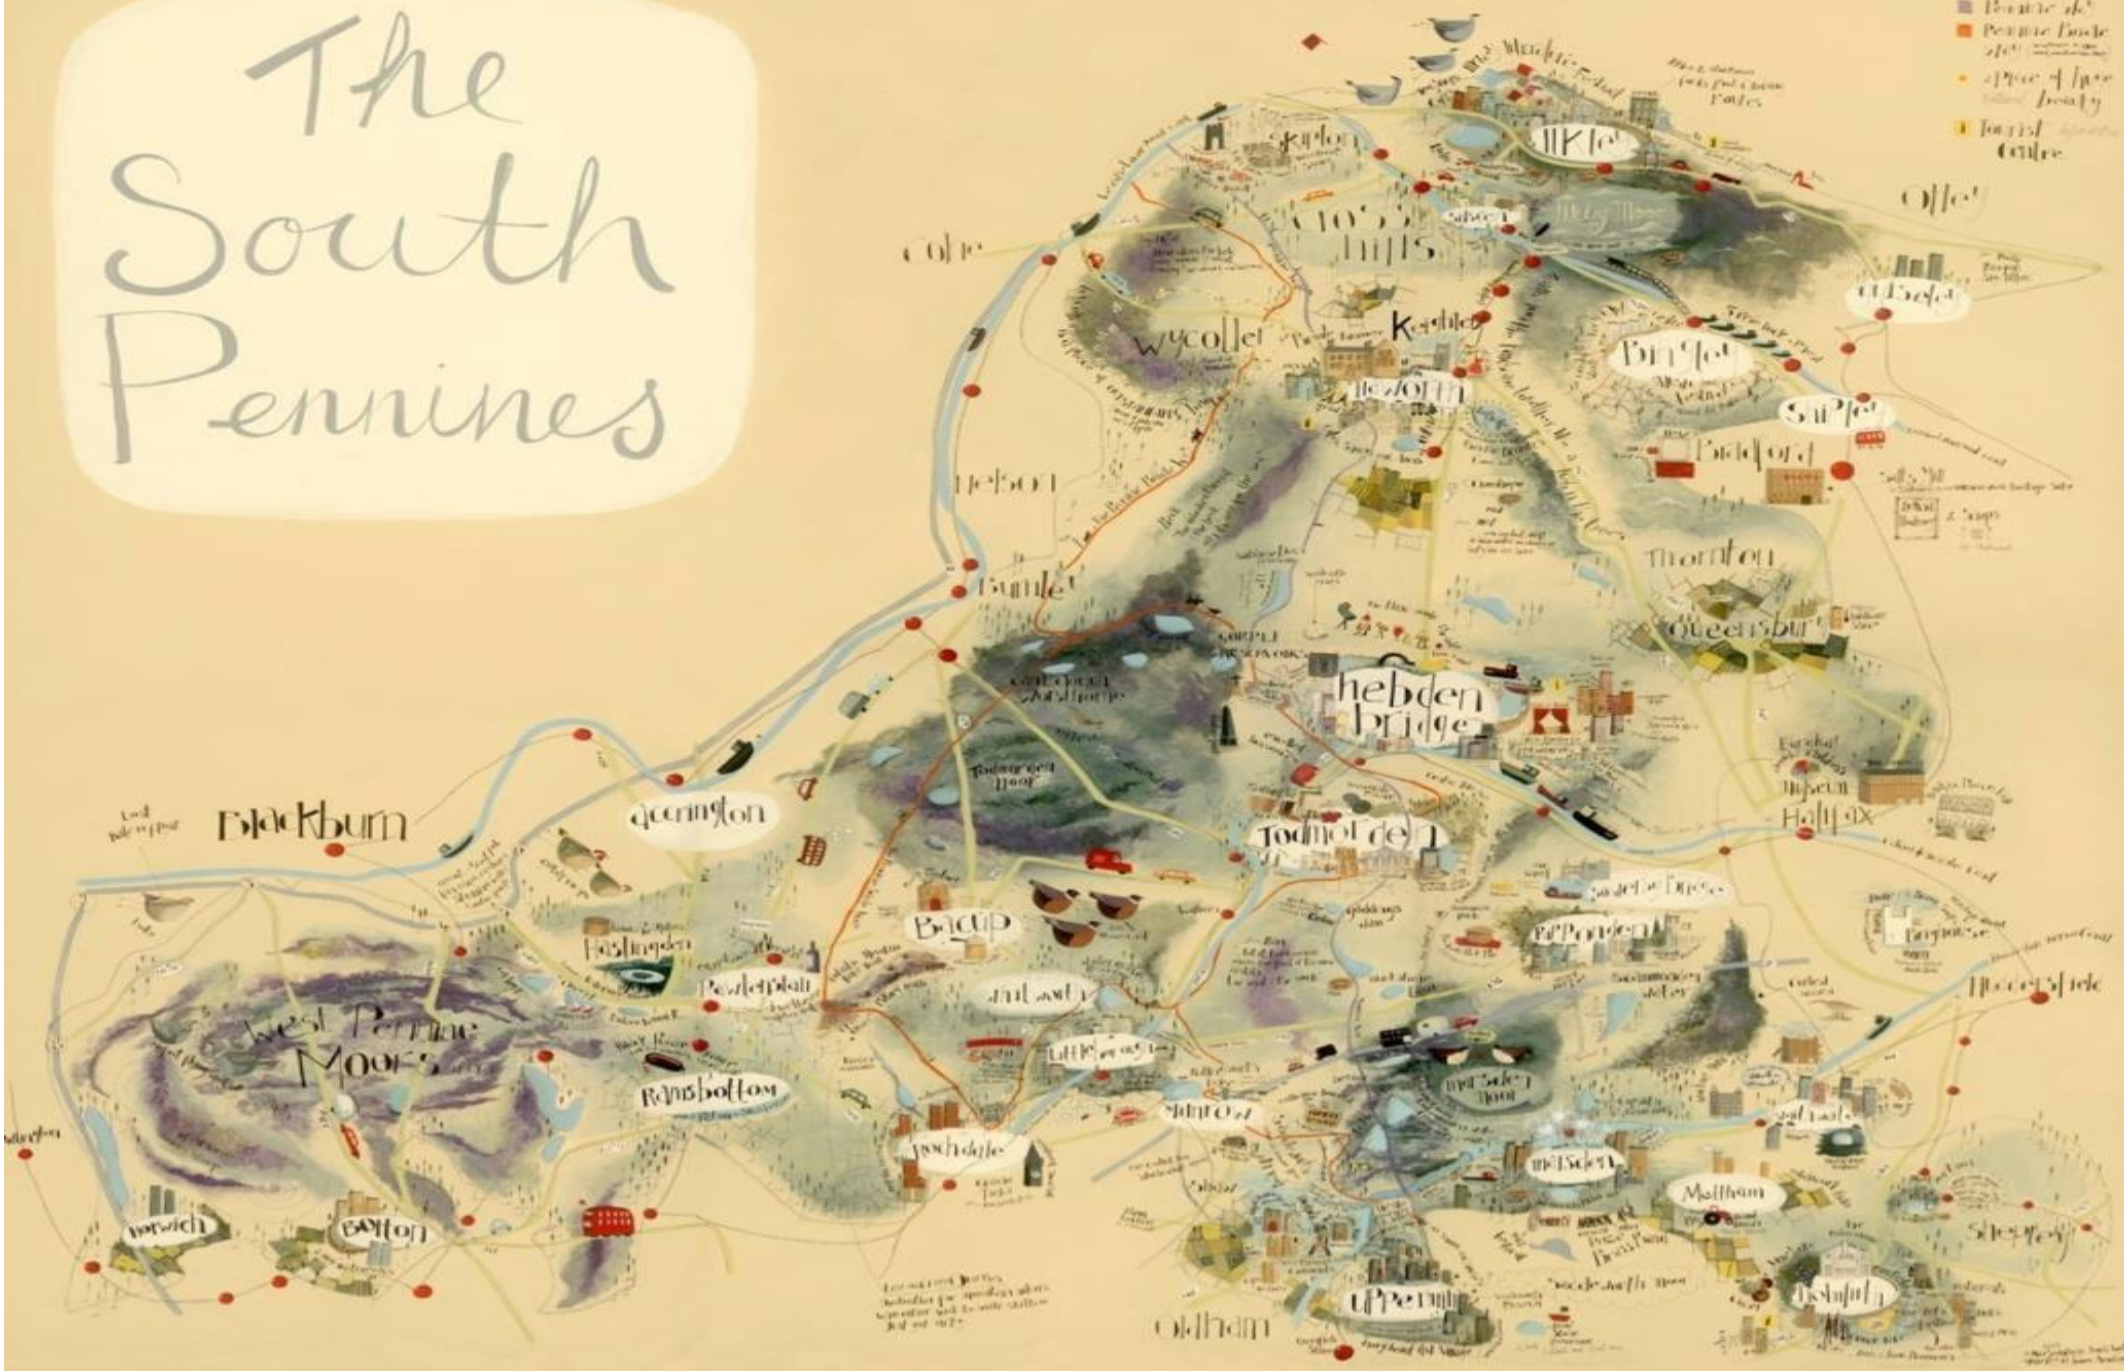

The Essentials

Well-being Goals

The South Pennines

This planet came with a set of instructions, but we seem to have misplaced them. Civilization needs a new operating system.

Paul Hawken
