

# Nature Recovery for Wildlife

Imogen Davenport

Conservation Director – Nature-based Solutions

# Stock Take

- 68% decline in vertebrate populations 1970-2016 globally.
- Humans account for 36% of mammal biomass. Domestic livestock 60%. Wild mammals 4%. The biomass of poultry is about 3x that of wild birds.
- Species abundance in the UK declined by 13% 1970-2016, overall; 60% for priority species.

Protecting **Wildlife** for the Future

# What do we need to do?

## STOP

- Allowing hostile barriers to wildlife
- Simplifying the environment
- Treating nature as an add-on

## START

- Creating space for nature everywhere
- Aiming for abundance not just survival
- Re-connecting everyone with nature
